Who We Are?

GREEN HORIZON

As Pacem International Youth Association, we strive to achieve make an impact on the world, not only for ourselves but for the next generations. Because of that, Our mission is to empower individuals worldwide to become active citizens who possess the power to shape a brighter future, both as individuals and as a group.

Pacem International Youth Association is not merely a name, but a declaration – a declaration of our unyielding commitment to fight for peace. We believe that through collective action, we can dismantle the barriers and pave the way for a better world.

“Si Vis Pacem, Para Bellum” If you want peace, get ready for war.

War against ignorance, poverty, disinformation, global warming and lack of education. A fight, neither with shields and swords nor guns or planes, but with pen and paper. A battle, not in trenches and swamps but in schools, homes, villages and towns. Together, as a united force, we shall prevail, we shall forge a path towards a brighter, more equitable, and peaceful future. Join us on this extraordinary journey, where each step brings us closer to the dawn of a new era – an era of peace, an era of Pacem.

Just like Atatürk says;

“Yurtta sulh, cihanda sulh.”

“Peace at home, peace in the world.”

“Pacem at home, pacem in the world.”

About Project

We are looking for 35 people in total for our project.

Sustainable development is not only about environmental protection, but also about social justice and equality. By raising awareness of sustainability issues among young people, we can promote a more inclusive and equitable society. For example, **we want to highlight the links between climate change and poverty, or between biodiversity loss and indigenous rights, and encourage young people to take action to address these inequalities.**

Raising awareness of sustainability issues among young people can also help improve international cooperation and solidarity. By promoting a shared understanding of global sustainability challenges and encouraging young people to work together across borders, we can build a more resilient and interconnected world. This could lead to the creation of partnerships and collaborations that address common sustainability challenges such as climate change, biodiversity loss or epidemics.

The Green Horizon is a project that aims to create long-lasting international cooperation to climate change. By working together in sessions and workshops to address the challenges and needs and create possible solutions, each member of the Green Horizon will improve their international collaboration.

Our Objectives:

- **Promoting sustainable practices and behaviors**
- **Engaging in dialogue to design and implement strategies for a sustainable future, addressing current challenges and needs**
- **Implementing tangible actions to enhance climate resilience**
- **Fostering innovation and entrepreneurship**
- **Addressing and reducing social inequalities**
- **Strengthening global collaboration and solidarity**

We Need Youth Activists

We are not looking for volunteers. We don't want participants. We don't seek for attenders.

We are looking for someone like us. We want youth activists, the ones who can't sleep at nights because of eagers to do something. We seek for someone who wants to do something mean to it.

We want to do it better than anybody you ever seen to it.
